- [response_200_flights](#)
- [response_400](#)
- [response_422](#)

response_200_healthcheck

server_status
String
example: Running

timestamp
Integer
example: 1681234567

response_200_flights

flight_number
String
example: SK001

origin
String
example: KMIA

destination
String
example: SCEL

departure
Date format: date-time
example: 2025-04-12T14:30Z

duration
Integer
example: 180

price
Float format: float
example: 250

response_400

error
String
example: Invalid departureDate format. Expected format: YYYYMMDD

response_422

error
String
example: You must provide future dates only, today is not acceptable
